

## **PRODUCT PROFILE**

- PRODUCT:** Affinity Purified Goat anti-Hamster IgG h+l – cross adsorbed antibody  
Minimal reactivity with mouse and rat
- CATALOG NUMBER:** GHHL-65AX9025
- LOT NUMBER:**
- QUANTITY:**
- PHYSICAL STATE:** Liquid
- BUFFER:** PBS, pH 7.2
- PRESERVATIVE:** 0.09% sodium azide
- STORAGE:** 2 - 8° C
- EXPIRATION:** 24 months from shipping date.
- PROCEDURE:** Goats were immunized with highly purified hamster IgG h+l and the resulting antiserum was collected. Antibody was solid phase adsorbed using mouse and rat immunosorbents to remove cross reactive antibody. Specific antibody was immunoaffinity purified off a hamster IgG containing immunosorbent. Antibody concentration was determined using an absorbance at 280 nm: 1.4 equals 1.0 mg of IgG.
- SPECIFICATIONS:** This antibody will react with hamster IgG and with light chains common with other hamster immunoglobulins as determined by ELISA and IEP techniques. It has less than 1% cross reactivity with mouse and rat IgG. This antibody is suitable for blotting, ELISA and IHC applications. This antibody may cross react with IgG from other species. Optimal working dilutions should be determined experimentally by the investigator.

**FOR RESEARCH AND MANUFACTURING ONLY; NOT FOR USE IN DIAGNOSTIC APPLICATIONS.  
FOR IN VITRO USE ONLY, NOT FOR HUMAN OR ANIMAL CONSUMPTION**
