

## **PRODUCT PROFILE**

- PRODUCT:** IgG Fraction Rabbit anti-BSA
- CATALOG NUMBER:** RAL-10GLY
- LOT NUMBER:**
- QUANTITY:**
- PHYSICAL STATE:** Lyophilized
- BUFFER:** PBS with non-protein stabilizer
- PRESERVATIVE:** None added
- STORAGE:** Lyophilized material should be kept at 4°C until rehydrated and will remain stable for a minimum of 2 years.  
Rehydrate by adding 1.0 mL of reagent quality water to the product vial. Store the liquid solution at 4°C for up to a month; thereafter, aliquots should be prepared and stored frozen. Stable for a minimum of 2 years at -20°C.
- EXPIRATION:** 24 months from shipping date.
- PROCEDURE:** Rabbits were immunized with highly purified bovine serum albumin (BSA) and the resulting antiserum was collected. The antiserum was delipidated, solid phase adsorbed, an IgG fraction was prepared and the antibody was lyophilized. Total antibody concentration was determined prior to lyophilization using an absorbance at 280 nm: 1.4 equals 1.0 mg of IgG.
- SPECIFICATIONS:** This antibody reacts with BSA as determined by IEP and Ouchterlony techniques. This antibody may cross react with albumin from other species. Optimal working dilutions should be determined experimentally by the investigator.
