PROCEDURE: Rabbits were immunized with highly purified Glutathione-S-transferase (GST) from *Schistosoma japonicum* and the resulting antiserum was collected. Antibody was immunoaffinity purified off a GST containing immunosorbent and conjugated with fluorescein isothiocyanate (FITC). Antibody concentration was determined using an absorbance at 280 nm: 1.4 equals 1.0 mg of IgG.

SPECIFICATIONS: This antibody reacts with GST as determined by IEP and ELISA techniques. It is suitable for blotting, ELISA and IHC applications. Optimal working dilutions should be determined experimentally by the investigator.
